SOFTWARE:NODE RED

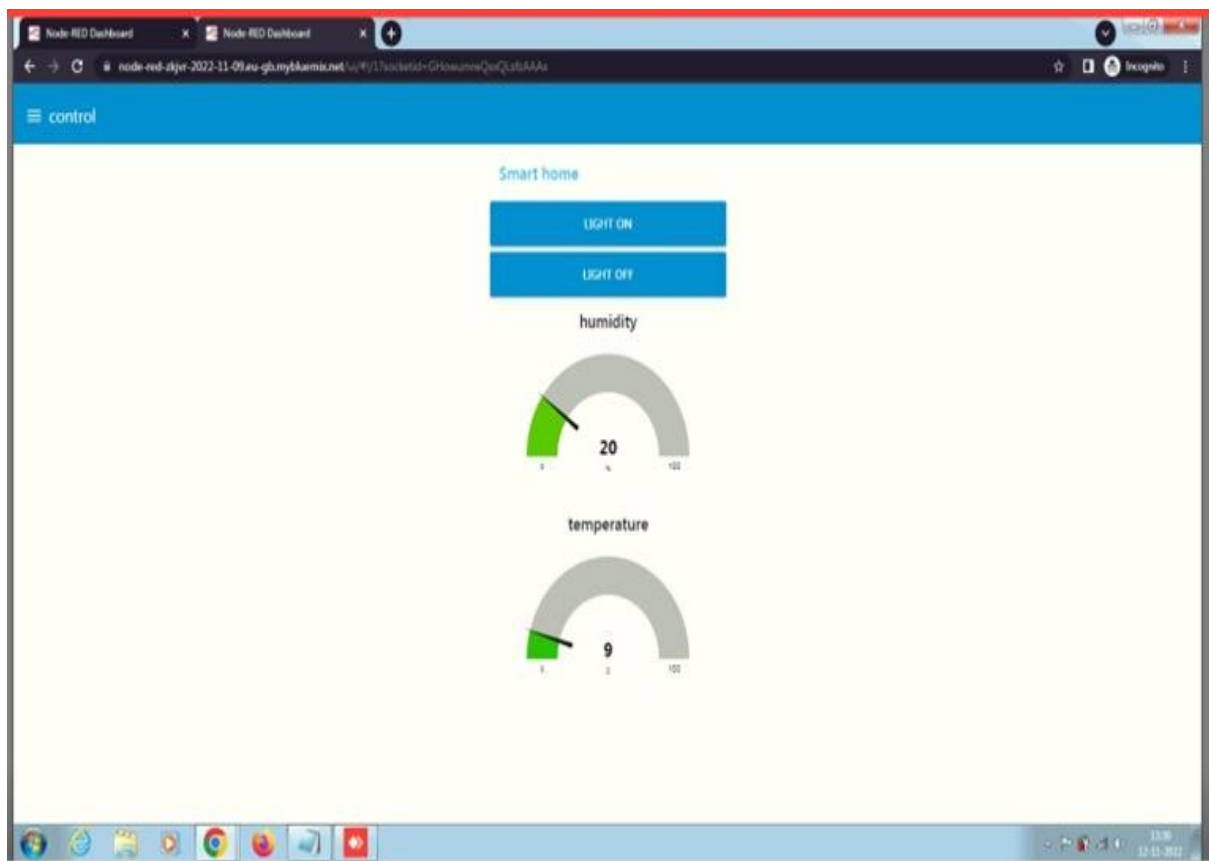

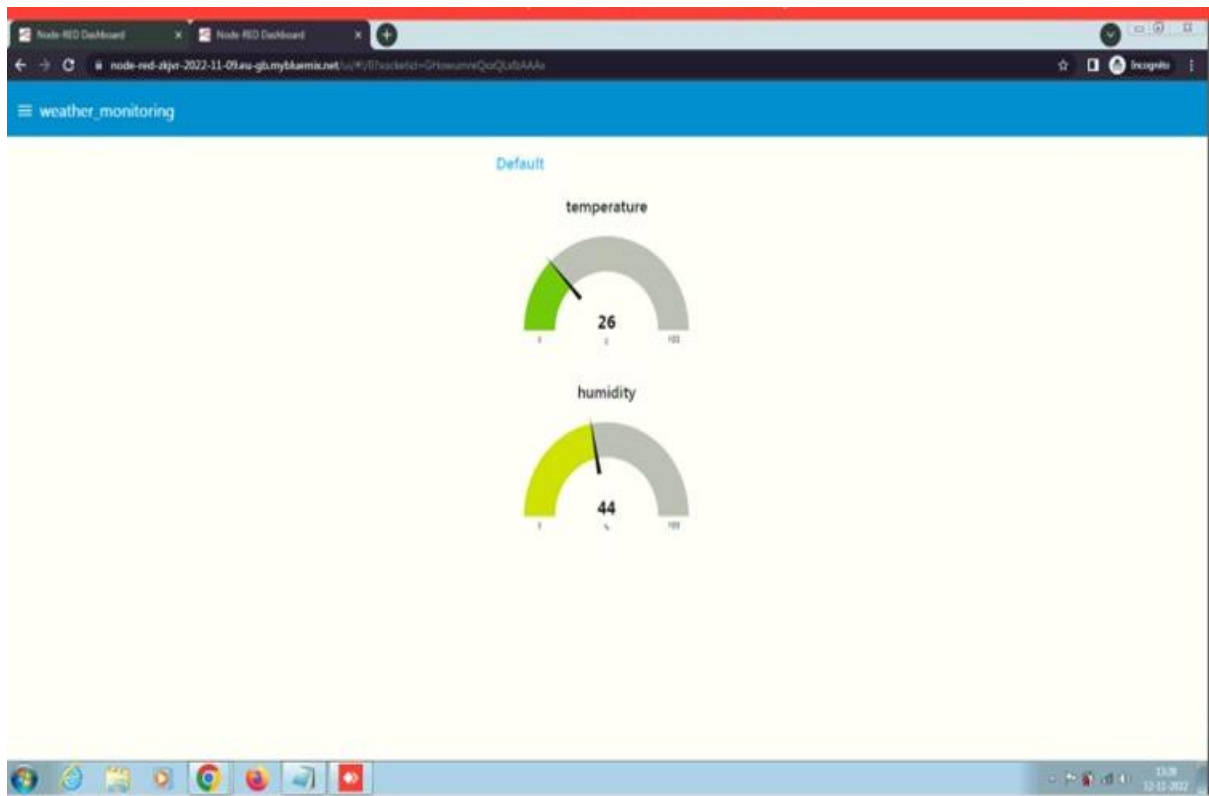

This screenshot shows the debug console of the Node-RED interface. The console displays a single message object:

```
{\"command\": \"lights on\"}
```

The browser's address bar shows the URL: `https://node-red-2kjr-2022-11-09.eu-gb.mybluemix.net/control?command=lights on`. The system tray at the bottom indicates the time is 13:38 on 12-11-2022.

Node-RED interface showing a flow diagram and a debug console.

Flow Diagram:

- Top Flow:** A sequence of nodes: `[get] sensor` → `webpage` → `http`.
- Bottom Flow:** A sequence of nodes: `[get] control` → `function` → `msg.payload`.
- Light Control Logic:** Two nodes, `LIGHT ON` and `LIGHT OFF`, are connected to three nodes: `mqtt in 1` (with a `connected` status), `msg.payload`, and `http`.

Debug Console:
